The management team of Faire Chance VoG

What is Faire Chance VoG?

Faire Chance is one in the East Belgian town of Kelmis
resident non-profit association, VoG called.

The association currently consists of five founding
members. The Fair Chance pursues social and altruistic
goals, for example: alternatives show up to people with
disabilities of any kind, into a self-determined and
independent to accompany life.

Fair Chance Kelmis will help people who are in have to
live in special situations. be it through Blindness,
declining visual impairment or other adequate disabilities,
which unfortunately are currently due to their Fellow
human beings, authorities or simply the general public
as no longer able to live normally, i.e. as not self-
constantly, but above all else as being unable to work
be considered. The club will therefore be the first and
important objective to represent the possibilities in
particular projects to implement the following goals,
refute the previous view of the general public and
of course, in the first place, the victims themselves
show alternatives.

What does Fair Chance want?

To implement this purpose, the VoG pursues the following
Activities: Various projects will be added contribute to
change the purpose, the intention of the association set.
The first and important project was therefore Project
Kelmiser Bier / The Blind Brewer started. At the Top a
blind brewer, a tested beer, a tested one Quality - and
proof that blindness is not the same life apart means.
More projects will be in follow this frame, such as next
one "Begegnungscafé", a kiosk, a wood workshop, a
Print, copy, scan and fax service, plus one Service for
the blind, such as broadcasts from Texts and print media
in Brail script and others.

How do we find the project ideas?

The founding members already came up with some project ideas to the inaugural meeting. In these reflections laid the foundations for founding our association. After basic considerations and verification of these ideas - need, feasibility and realization - these project ideas were put into concrete terms. business plans, Budget plans and determination of required resources were tackled and the implementation of the projects started after an evaluation phase.

These are the projects that have already started:

1. The Blind Brewer
2. Kelmiser sweets
3. Workshops (wood, metal, others)
4. Meeting Café / Meeting Center
5. Social Counseling
6. Kiosk, Services
7. Training, education, IT

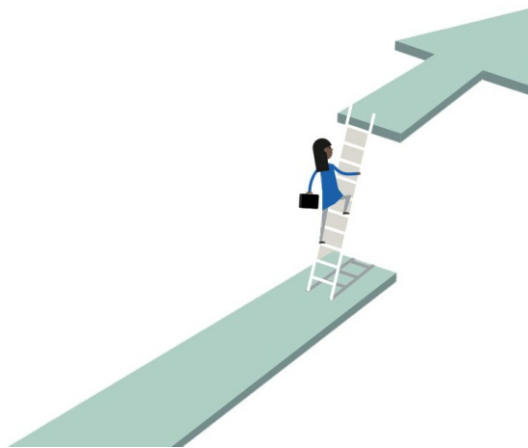

Further project ideas can be submitted to the board and the Board of Directors of Faire Chance VoG presented in writing become. According to the example above, these ideas are checked.

Join us too! Our email address is:
info@fairechance.eu

What do we want?

We are still on a makeshift ladder.
But we want barrier-free access for everyone
to a livable, self-determined life!
That's exactly what we're working on!

Cozy get-together after work

Who can join us?

We address ourselves to people with handicaps as well as to People without a handicap, be it for working in the club such as working on or in the respective projects.

The way of brainstorming, planning, preparation as well the implementation / realization requires time, employment with the circumstances and often learning on your own. Only this way we can work together on the future and our goals work.

Therefore we are for everyone who participates in Faire Chance want, grateful - be it as a co-thinker, advisor, member, Sponsors or donors alike.

Here is an overview of this topic:
